geometry from ancient greek γεωμετρία *geōmetría* land measurement from γῆ *gê* earth land and μέτρον *métron* a measure citation needed is with arithmetic one of the oldest branches of mathematics it is concerned with properties of space such as the distance shape size and relative position of figures 1 geometry the branch of mathematics concerned with the shape of individual objects spatial relationships among various objects and the properties of surrounding space it is one of the oldest branches of mathematics having arisen in response to such practical problems as those found in surveying and its name is derived from greek words meaning earth measurement free interactive video lessons on geometry the mathematics of lines shapes and angles essential stuff for describing the world around you analytic geometry distance and midpoints dividing line segments problem solving with distance on the coordinate plane parallel and perpendicular lines on the coordinate plane equations of parallel and perpendicular lines challenge distance between a point and a line geometry is all about shapes and their properties if you like playing with objects or like drawing then geometry is for you plane geometry is about flat shapes like lines circles and triangles shapes that can be drawn on a piece of paper solid geometry is about three dimensional objects like cubes prisms cylinders and spheres interactive free online geometry tool from geogebra create triangles circles angles transformations and much more geometry dash world is an excellent addition to your gaming library this game features two worlds with five levels each new 2 1 icons a store a new vault daily quests levels and prizes and chests as of version 1 0 geometry dash subzero robert topala announced the release of a third spin off game geometry dash subzero on december in euclidean geometry there are two dimensional shapes and three dimensional shapes in a plane geometry 2d shapes such as triangles squares rectangles circles are also called flat shapes in solid geometry 3d shapes such as a cube cuboid cone etc are also called solids the basic geometry is based on points lines and planes what is geometry geometry is a branch of mathematics that studies the sizes shapes positions angles and dimensions of things 2d shapes in geometry flat shapes like squares circles and triangles are a part of flat geometry and are called 2d shapes these shapes have only 2 dimensions the length and the width
